SolarWinds® Virtualization Manager delivers integrated VMware® and Microsoft® Hyper-V® capacity planning, performance monitoring, VM sprawl control, VDI performance monitoring, configuration management, and chargeback automation - all in one surprisingly affordable product that's easy to download, deploy, and use.

Virtualization Manager at a Glance

- Real-time dashboards simplify identification & troubleshooting of performance, capacity & configuration problems
- Identifies VM sprawl, helps you reclaim & optimize space, and reduces licensing costs
- Integration with Server & Application Monitor provides complete visibility of the application stack - from app to VM to datastore - on the Orion® Web interface
- Use baseline thresholds to alert on performance discrepancies on clusters, hosts, VMs, and datastores
- Easy to download, deploy & use - start monitoring your VMs in less than an hour

Features

Heterogeneous Virtualization Management

Manage both VMware and Microsoft Hyper-V environments from a single pane of glass.

Virtualization Performance Monitoring & Management

Proactively monitor and analyze virtualization-specific performance problems in VMware and Hyper-V environments.

Application Monitoring Integration

Integration with Server & Application Monitor (SAM) for end-to-end application infrastructure stack monitoring and visibility.

Enhanced NPM & SAM Virtualization Metrics

Integration with the Orion platform gives you more Virtualization Manager metrics alongside data from SolarWinds Network Performance Monitor (NPM) and Server & Application Monitor (SAM). Get access to several new features in Orion, such as role-based access control, web-based reporting, alerting, improved virtual machine management, and a synchronization wizard.

VDI Performance Monitoring & Management

Monitor Virtual Desktop Infrastructure (VDI) performance, quickly troubleshoot issues, and easily plan VDI rollouts.

VM Right-Sizing & Capacity Planning

Manage, plan, and optimize VMware and Microsoft Hyper-V virtual infrastructure capacity.

Virtualization Dashboards

Get at-a-glance insight into the performance, capacity, configuration, and usage of your virtualized infrastructure.

VM Sprawl Control

Find stale VMs, zombie VMs, orphaned files, and over-allocated VMs.

Virtualization Performance Alerts

Quickly discover and act on performance issues using flexible alerts within Virtualization Manager which triggers alerts when a VM fails to respond during the expected interval. With the integration in to Orion, now set dynamic thresholds from baselines and get alerted when your virtual appliance is about to reach warning or critical states.

Visibility into Virtual Machines

Get complete visibility into all your virtual machines irrespective of whether they're managed stand-alone in virtualization manager or in SolarWinds SAM or NPM

Virtualization Configuration Management

Tracks VM and host configurations over time and helps you determine if your virtual environment configuration is drifting from the gold standard.

Virtualization Dependency Mapping & Historical Forensics

Map dependencies and perform forensic troubleshooting and problem analysis.

Virtualization Chargeback & Showback Automation

Govern and chargeback/showback IT, infrastructure, and cloud services.

Integration with Other SolarWinds Products

Integration with SolarWinds Server & Application Monitor

Virtualization Manager is integrated with SolarWinds Server & Application Monitor for the complete management of applications and server hardware. You can now look at end-to-end monitoring and application specific infrastructure views that simplify troubleshooting and performance management.

Integration with SolarWinds Network Performance Monitor

Virtualization Manager is integrated with SolarWinds Network Performance Monitor which helps you manage your IT infrastructure. This integration helps you look beyond virtual servers, VMs, applications running in VMs, and other virtual appliances. Get ultimate visibility from the network device to the application and everything in between - all in a single pane of glass.

Integration with SolarWinds Storage Manager

Virtualization Manager's integration with SolarWinds Storage Manager gives you a centralized look across your entire virtual infrastructure. You can now drill-down in the storage supporting a specific virtual machine - all the way from VM to spindle.

HARDWARE	MINIMUM REQUIREMENTS
CPU	2GHz Quadcore
Virtual CPU	4 vCPU
Memory	8GB + RAM minimum recommended
Hard Drive	200GB + free disk space (thin provision by default for VMware)
Other	Virtual appliance based installation
SOFTWARE	MINIMUM REQUIREMENTS
OS	Runs on VMware vSphere® v5.x, 4.x, or Microsoft Hyper-V 2008/2012
Database	Integrated with virtual appliance

NOTE: The minimum server requirements listed assume default configuration. Significantly increasing the poll rate or statistic collection rate could result in additional load on the server, which may require a larger CPU or additional memory

Try Before You Buy. Download a Free Trial!

Don't just take our word for it. At SolarWinds, we believe you should try our software before you buy. That's why we offer free trials that deliver full product functionality. Simply download and install the software and take a break while SolarWinds Server & Application Monitor discovers your applications and servers. When you get back, your application and server monitoring environment will be waiting for you - complete with out-of-the-box dashboards, alerts, reports, and more! It's that simple!

About SolarWinds

SolarWinds (NYSE: SWI) provides powerful and affordable IT management software to customers worldwide. Focused exclusively on IT Pros, we strive to eliminate the complexity in IT management software that many have been forced to accept from traditional enterprise software vendors. SolarWinds delivers on this commitment with unexpected simplicity through products that are easy to find, buy, use, and maintain, while providing the power to address any IT management problem on any scale. Our solutions are rooted in our deep connection to our user base, which interacts in our online community, thwack®, to solve problems, share technology and best practices, and directly participate in our product development process.
