

SOLARWINDS NATIONAL GOVERNMENT QUICK REFERENCE

Orion - Core and Integrated Products

	NETWORK PERFORMANCE MONITOR	NETWORK CONFIGURATION MANAGER	NETFLOW TRAFFIC ANALYZER	SERVER & APPLICATION MONITOR	VIRTUALIZATION MANAGER	STORAGE RESOURCE MONITOR
WHAT	Comprehensive Network Fault and Performance Monitoring	Automated Network Configuration and Compliance Management	Detailed Visibility to Network Bandwidth Utilization	Availability and Performance for Both Infrastructure and Applications	Comprehensive Infrastructure Monitoring and Management	Multi-Vendor Performance and Capacity Monitoring
HOOKS	<ul style="list-style-type: none"> NetPath troubleshooting Automated device discovery Easy installation and setup Updated web console Custom network maps Intelligent alerting Customizable reporting Wireless Monitoring Cisco Switch Stack support ServiceNow integration 	<ul style="list-style-type: none"> Backup and archiving Real time change detection Bulk change management NIST NVD for Cisco IOS Change/compliance reports Request and approval workflow DISA STIG and NIST FISMA compliance reporting Multi-vendor support 	<ul style="list-style-type: none"> Who, What, Where and When of network utilization Multi-vendor support Find "top talkers" Filter by application, IP groups and more Cisco NBAR2 support Network traffic forensics 	<ul style="list-style-type: none"> HW health monitoring Pre-built and customizable application templates WMI or agent based monitoring Threshold based alerting and benchmarking Asset inventory AppStack integration/views Active Directory discovery ServiceNow integration 	<ul style="list-style-type: none"> Performance monitoring and alerting Utilization and configuration monitoring Management actions: move, delete, and change config VM Sprawl control/visibility Capacity planning AppStack integration/views 	<ul style="list-style-type: none"> Single view across all vendors Automate capacity planning/reporting Map virtual machines to storage AppStack integration/views Supported storage devices
LICENSE	Tiers of capacity based on network elements; nodes, interfaces and volumes	Tiers of capacity based on networking devices / nodes only	Tiers of capacity that need to match base NPM license	Tiers of capacity that account for nodes and component monitors	Tiers of capacity determined by number of populated CPU sockets	Tiers of capacity based on number of physical disks
FedRev. 08 01.16	OC, CCC, ODC   	OC, CCC, ODC   	OC, CCC, ODC   	OC, CCC, ODC, AS   	CI, HI, AS, ODC   	OC, AS   
	DATABASE PERFORMANCE ANALYZER	LOG & EVENT MANAGER	USER DEVICE TRACKER	VOIP & NETWORK QUALITY MANAGER	IP ADDRESS MANAGER	
WHAT	Performance Analysis for SQL, Oracle (including 12c), DB2, Sybase, and MySQL	Powerful, Affordable & Easy to Use SIEM (Security and Information Event Management)	Automated Device Detection, Tracking and Switch Port Management	Phone Call and Point to Point Quality of Service Monitoring	Automated Address Management and Scope Monitoring	
HOOKS	<ul style="list-style-type: none"> Analyze SQL statements, server resources, DB configuration, I/O and more Detailed response time data and historical trending Enhanced query blocking and deadlock analysis Deployable on-premise, virtualized, or in the cloud Agentless multi-vendor support Alerting, baselines and reports Improve performance, reduce hardware requirements/costs 	<ul style="list-style-type: none"> Real-time event correlation Virtual appliance Advanced search and analysis Active response File integrity monitoring Data compression & retention Extensive data sources support Highly customizable views and filters Single Sign-On/Smart Card Integration 	<ul style="list-style-type: none"> Port tracking Find and isolate security threats White, black, watch listing Rogue device detection Remote port shutdown Comprehensive search Switch capacity and utilization 	<ul style="list-style-type: none"> Call detail records Measure call quality Performance alerting Customizable reports VoIP and WAN capacity planning 	<ul style="list-style-type: none"> Import/replace spreadsheets Centrally manage, alert and report Automate scanning/data collection Manage, monitor DHCP/DNS Address conflict detection IPv6 support and migration planning 	
LICENSE	Per database instance	Tiers of capacity based on number of log source nodes. Workstation licensing also available	Tiers of capacity based on the total number of ports to be monitored	Tiers of capacity by two factors; number of phones supported and operation source devices	Tiers of capacity based only on active addresses: Used, Reserved, Transient

SOLARWINDS NATIONAL GOVERNMENT QUICK REFERENCE

Additional Products - Orion Scalability Components

	WEB PERFORMANCE MONITOR	PATCH MANAGER	WEB HELP DESK	ENGINEER'S TOOLSET	NETWORK TOPOLOGY MAPPER	SERV-U
WHAT	Website and Web Application Transaction Monitoring	Automated Patching of Microsoft and Third Party Applications	Customizable and Affordable Ticketing, Request and Asset Management	Tools for Network Management, Real-Time Monitoring and Troubleshooting	Automated Network Discovery and Mapping	Easy to Use and Secure File Transfer Management
HOOKS	<ul style="list-style-type: none"> Cloud based transaction monitoring Simulate user experience Monitor individual steps Monitor from multiple locations Robust transaction alerting AppStack integration/views 	<ul style="list-style-type: none"> Extend capabilities of WSUS and SCCM Third party patch service Patch compliance reporting Custom package wizard 	<ul style="list-style-type: none"> Full featured help desk ticketing and IT request Link parent/child requests Customizable workflows Approvals and panel voting Asset discovery and import Asset tracking and reporting Uses FIPS cryptography Customizable knowledgebase Additional product integrations 	<ul style="list-style-type: none"> The network engineer's Swiss Army knife Real-time monitoring tools Configuration management tools IPAM, DNS, DHCP tools SNMP utilities and more Orion console integration for fast launch 	<ul style="list-style-type: none"> Multi-level discovery with detailed device info Automatic network map creation Export to Visio, PDF, PNG or Orion Network Atlas Auto-Detect changes with scheduled scanning Address compliance for up-to-date network diagram Reporting for inventory and network information 	<ul style="list-style-type: none"> Secure file transfer using client or browser FTPS, SFTP & (HTTP/S) Secure web management console Access control with granular permissions Automated notifications Intuitive web interface Leverage existing IT infrastructure and Active Directory
LICENSE	Tiers of capacity by total number deployed recordings	Tiers of capacity based on number of systems	Per technician seat licensing. No client or other licensing required.	Single installation license with optional Orion Core installation	Single installation license	Per server/installation licensing
FedRev. 08.01.16	OC, CCC, ODC, AS   	CI, ODC   	  	OC, ODC  	ODC  	  
	DAMEWARE REMOTE SUPPORT	DAMEWARE MINI REMOTE CONTROL	KIWI SYSLOG SERVER	KIWI CATTOOLS	MOBILE ADMIN	ORION SCALABILITY COMPONENTS
WHAT	Collection of Windows Systems Administration Tools	Affordable, full featured and Easy to Use Remote Desktop Capability	Easy to Use, Efficient and Affordable Log Collection	Affordable and Easy to Use Configuration Management	Access to Monitoring and Management Tools for Administrators	Additional Polling Engine and/or Web Server, Enterprise Operations Console, Fail Over Engine
HOOKS	<ul style="list-style-type: none"> Includes DameWare Mini-Remote Control Remote windows administration Reboot computers, start/stop Windows services and more Add, delete, and update Active Directory Objects Manage multiple Active Directory domains from one console 	<ul style="list-style-type: none"> Easy-to-use remote control desktop sharing Windows, Linux, Mac OS X Does not lock out end users Built-in chat functionality Click to capture screenshots to document configurations Remote access privilege options via Group Policy Support for smart card authentication (CAC) 	<ul style="list-style-type: none"> Efficient high volume log collection Secure web based access Advanced filtering and script-based Log Processor Robust alerting and automated archiving Free Windows Event Log Forwarder Advanced forwarding 	<ul style="list-style-type: none"> Automatic backups History with rollback Compare configurations Perform changes across multiple devices IPv6 and SSL/TLS email support Automatic configuration and change management reports Support for industry-leading manufacturers 	<ul style="list-style-type: none"> Access tools from mobile device or tablet; iOS, Android, BlackBerry Active Directory integration to manage AD objects Access to SolarWinds Orion VMware and Hyper-V Microsoft Exchange and Lotus Domino Symantec's Backup Exec™ and NetBackup™ 	<ul style="list-style-type: none"> Updated Orion Platform Polling Engine - Distributes load for a core installation Web Server - Detach web console from application server for more user access EOC - Consolidate data from multiple cores into a single console FOE - Passive failover server for primary server and more
LICENSE	Single installation license with optional server license management	Single installation license with optional server license management	Single installation license	Single installation license	Per seat license with low cost unlimited license	Single Installation licenses FOE - primary products per server
