## External Threat Monitoring

## Internal Threat Monitoring

## Protect Systems

## Protect Data In Flight

### Threat Monitor – IT Ops Edition

- Centralized, cloud-based security monitoring
- Simple, scalable, rapid deployment
- Continuously updated thread intelligence data
- Security Information and Event Management (SIEM)
- Automated threat response
- Integrated compliance tools

### Log & Event Manager

- Real-time event correlation
- Threat intelligence
- Active response
- Advanced search and forensic analysis
- USB device monitoring
- IT compliance reporting

### Access Rights Manager

- Permission Analysis
- Security monitoring of Active Directory and file servers
- User rights provisioning
- Record access rights activity
- Create audit proof reports
- Role & process optimization

### Patch Manager

- Intuitive patch management software for quickly addressing software vulnerabilities
- Simplified Patch Management
- Expand on WSUS
- Use SCCM with Ease
- Keep your desktops, laptops, servers, and VMs patched and secure with the latest patches for 3rd-party applications.
- Demonstrate Patch Compliance

### Serv-U Managed File Transfer Server

- Enhance security and control over file transfers in and outside your organization
- Reliable FTP server software for secure file transfer
- Ad hoc file sharing to easily send and request files
- Anywhere, anytime file transfer from web and mobile devices
- Upload and download large files quickly and easily
- Centralized file transfer management and automation
- Maintain regulatory compliance

### Serv-U File Transfer Protocol Server

- Simple, affordable, easy-to-use FTP server software
- File transfer using FTP and FTPS
- Quick and easy file transfers from the web and mobile devices
- Transfer multiple and large files easily
- Simple file transfer administration and management
- Secure gateway helps avoid data at rest in DMZ networks
- Easily manage file transfer settings and permissions

### Serv-U Gateway

- Serv-U Gateway is a safety addition to Serv-U MFT Server and Serv-U FTP Server
- Helps ensure that no data is stored in the DMZ
- Helps you meet compliance standards
- Simple GUI-based installation and configuration
- Supports FIPS 140-2 validated cryptography
- Supports active-active N+1 horizontal scaling of Serv-U MFT Server
